## PRESIDENT'S MESSAGE

Greetings everyone,

As we enter spring, there is no doubt in my mind that 2021 will be a year of transition. As we emerge from the COVID-19 pandemic, we have an important opportunity and charge to come together and reconnect as a medical community at county and state levels, uniting around our shared vision of a world where innovation and knowledge optimize medical care and outcomes. We have spent the last year physically separated from each other, focused on survival and healing in the midst of serving on the front lines of a global health crisis.

I see opportunity and hope on the horizon to come together as a community of healers. My hope for and my challenge to our members for the next year and beyond is to not lose sight of our strengths or the sense of community that has grown out of our shared vulnerabilities and our shared sense of purpose to find solutions for ourselves, our patients and our communities.

As an organization, we need to make great strides in the projects aligned with our Strategic Priorities over the next year. We must truly embrace digital transformation – as an organization through the GCMS and MSMS virtual seminars and at the member level every day in working with our patients. Digital transformation will improve our patient's health and their outcomes. True digital transformation should improve our life or at least make it easier. It is one of the tangible pieces of the puzzle to positively impact clinician wellness, it disrupts and challenges old notions of care delivery, and it can help to make meaningful strides to improve health equity. The future that we've been talking about for a decade with telehealth and other digital transformation efforts is here to stay and we must embrace it and lead it for our patients and ourselves.

In what will ultimately be known as the post-COVID era, we need to examine how we can thrive as an organization. It will be critical for us to think about how we provide value to our members, our patients and our communities. This is a great challenge but presents an incredible opportunity for all of us. Looking forward to a great spring time to connect and to learn as we go along.

Until next time, stay safe and healthy!

Sincerely,

Sunilkumar Rao, DO,MHA,FACC,FACP  
President

## State of the Art Cancer Treatment in Genesee County

This month's article is very personal & dear to my heart. March 13, 2021 marked the 51-year anniversary of the passing of my mother. She had an aggressive type of cancer with few poor options for treatment back in 1970. I am very appreciative of the advances made in treatments for various aggressive cancers.

Proton Beam Therapy Technology (PBTT) is a newer technology utilizing an external beam that uses ionizing radiation. PBTT utilizes a particle accelerator to target a solid tumor with a beam of protons. The positive charged particles (protons) damage the DNA of cancer cells, killing them by stopping their reproduction thus eliminating the tumor.

The benefit of Proton Beam Therapy Technology is the precision of the treatment on the tumor. Improved control of the concentrated area of the tumor, thus effecting less healthy non-cancerous tissue. Conventional radiation goes through the entire body where proton therapy subatomic particles stop at the designed target depth. When the proton hits the target depth it deploys 70-80% energy within a few millimeters of the specific target site.

Proton Beam Therapy Technology provides a greater precision in the treatment with less side effects. The technique is called pencil beam scanning. PBTT is pencil beam scan concentrating almost exclusively on the cancerous site with extreme precision. The PBTT Advantage is reducing 70% of normal tissue radiation, avoiding normal organ unnecessary radiation treatment. Some cancers treated with conventional Xray technology may have permanent side effects. The sparing of normal tissue helps eliminate side effects & leads to a better quality of life for the patient post procedure. A few examples are left breast cancer (avoiding radiation to the heart), and some brain tumors (avoiding radiation to the normal areas of the brain).

DAVID HOFF, MA, CCP

Proton Beam Therapy Technology can be one treatment or several treatments (determined by the oncologist). This is dependent on type of tumor & location in the body. It may also be utilized in conjunction with other treatment options available. PBTT is indicated for several different types of cancerous tumors.

Currently there are two sites in Michigan that offer Proton Beam Therapy Technology. I am very pleased this advanced treatment for cancer is available in Genesee County.

This article was written with collaboration from

Dr. Hesham Gayar, MD.

# PROTON THERAPY: CANCER TREATMENT WITH MINIMAL SIDE EFFECTS.

Proton therapy delivers treatment to tumors with extreme precision, while minimizing radiation exposure to surrounding healthy tissues. As a result, healthy tissue and organs are spared from as much as 70 percent of unnecessary radiation delivered by other methods, lowering the risk of side effects and complications that may result from radiation therapy, thus improving patients' quality of life during and after therapy with protons.

Since proton therapy spares healthy tissue, the treatment is used commonly on solid tumors in sensitive areas of the body where conventional therapy may cause short or long-term harm, and even risk of secondary cancer. Those cases may involve tumors close to critical structures, difficult to treat cancers, and recurrent cancer after receiving previous radiation. For cancers requiring reirradiation, proton therapy is the best choice, and often the only choice.

- Bladder Cancer (select cases)
- Brain and Central Nervous System Cancer
- Breast Cancer
- Esophageal Cancer
- Head and Neck, and Skull Base Cancer
- Kidney Cancer
- Lymphoma (especially in the neck, mediastinum and abdomen)
- Liver Cancer (especially hepatocellular carcinoma and metastatic liver cancer)
- Lung Cancer (especially centrally located and tumors spread to lymph nodes in the mediastinum)
- Pancreatic Cancer
- Prostate Cancer
- Sarcoma
- Spine and Chest Wall-involving Cancer
- Select Gynecological and Gastrointestinal Cancer
- Recurrent Disease (even if previous radiation has been given)

### **S. Korea, the Electronics Giant**

After the end of World War II, the Korean peninsula was divided into North and South Korea. A relatively new nation, S. Korea has become a highly developed country to become the leader in electronics and information technology. The economy soared to make the country one of the leading economies. Half of the population lives in it's capital, Seoul.

Our first day in Seoul, S. Korea, has been very enjoyable. The country is a leader in electronics. Having a ninety percent literacy, S. Korea has a high employment rate as well. Although I did visit the country before, the second time around was as interesting as the first. The day began with a visit to Jogyesa, one of the oldest and chief temples of the Jogye Order of Korean Buddhism. The panels on the outside walls of the temple narrate the life of the Buddha in beautiful paintings. Inside were three huge gold statues of him. In the foreground was a granite statue of the Laughing Buddha and another of the Boddhisatva.

A short ride took us to the Gyeongbokgung Palace, the largest of five palaces in downtown Seoul and commonly known as the Northern Palace, was built in the fourteenth century. The other three are, Changdeokgung (Eastern Palace) and Gyeonghuigung (Western Palace) Palace. Spread over several acres and built with the Feng Shui principle, they all have mountains in the background and water in the front. Included on the premises is a man made pond which served as the king's private fishing spot. A very interesting and ceremonial change of guard was observed. This ritual is carried out twice a day. The nearly four mile sightseeing walk, worked up an appetite that needed attention. We enjoyed a traditional Korean meal. My choice was the ever popular bibinbap.

We, then, headed to he Namsangol Hanok Village. It is a traditional village featuring Korean houses, pavilions, a beautiful small pond, and an interesting time capsule. The village shows what life during the Joseon Dynasty was like. This is one of the most beautiful and scenic locations that's visited by all tourists to Seoul.

Our last stop of the day was the N Seoul Tower, also known as the Namsan Tower or Seoul Tower, it is a communication and observation tower. It is located on Namsan Mountain and is the second highest point in Seoul.

After a hectic schedule, all we wanted to do is to grab some pizza and retire for the day.

Our itinerary for the following day is nothing like any we had done before. It was filled with intrigue and beyond my imagination. We took an early morning and much awaited trip to the DMZ (DeMilitarized Zone), considered as the most dangerous place on earth. The Han River, in the area, flows into Imjin River that separates the N. and S. Koreas. Mountains on both sides of the N. and S. Koreas act as a backdrop to the four kilometer strip of land separating the two countries. It is evidence of the tension between the two enemy nations with troops, guard posts, tanks, bunkers, missile, gun emplacements, land mines among other means of destruction.

The deadliest DMZ is located at the Imjin River and stretches some two hundred and forty eight kilometers across the Korean Peninsula. Human activity in the area has been greatly limited for the past half-century. It is sad to think that soldiers outnumber civilians. One can find both towering monuments to battles won and derelict ruins that are evidence to the tragedy of war that killed more than six million.

We took in the views of N. Korea from atop the observatory. It was an eerie feeling to think that we were just a few kilometers from the most dangerous place on earth. A walk through one of N. Korea's infiltration tunnels gave us goosebumps. As many as thirty thousand troops could pass through the tunnel and destroy their enemy in just a few hours. We also visited Panmunjeom, the Joint Security Area in the middle of the DMZ where negotiations between the two sides are held. Beyond the DMZ is the Unification Village where about two hundred peace loving people live between the two tension filled countries.

A few minutes' drive took us to Darasan Station, the northern most and the last railway station of S. Korea. The tour ended with another traditional Korean lunch.

A five hour tour of the DMZ was not enough cos there is so much to see and learn about the area. Yet, this trip made an indelible mark on my heart and soul that it will be etched in my mind forever! Am I feel blessed to be living in a free country, never worrying about tensions of invasion!!

Our free day was spent visiting the Lotte World Tower. Standing 554.5 meters tall, it is the tallest building in Seoul, S. Korea and fifth tallest building in the world. It took five years to build this one thirty four floors skyscraper. The super fast elevator to the observation decks, located at different levels, has a pyrotechnic show of the city scape that was awesome! The country sure is high tech!!

Later, we grabbed a quick lunch and did some power shopping, getting gifts to take back home to our near and dear. The evening was spent sampling the famous Korean street food. A little here and a little there, added up to a lot! Boy, do I feel stuffed after consuming so much food that was washed down with delicious rice tea! It is now time to get back to the hotel and hit the sack.

Korea has worked hard for industrial development, but also to curb its pollution to build a green nation and could be a motivator for other countries to follow.

There is a dangerous bill making its way through the state legislature that would immediately negatively impact the health and wellbeing of patients across Michigan while also setting a dangerous precedent for the future of patient care.

House Bill 4359 removes the common-sense requirement that a physician supervise anesthesia procedures in Michigan. Plainly put, it is legislation that allows hospitals to replace doctors with nurses. It is nothing more than a cost-cutting measure that threatens the health and safety of Michigan's patients.

We are already seeing the negative consequences of this kind of legislation play out in neighboring states.

A hospital in Wisconsin recently replaced all its anesthesiologists with certified registered nurse anesthetists (CRNAs), undermining the value and expertise of physicians and jeopardizing patients in the process. It's a move that demonstrates that too many hospitals are driven by their financial bottom line, and it begs the question of what cuts come next? Where does it end once hospitals decide they can replace physicians with nurses?

The Michigan State Medical Society has battled back against certified registered nurse anesthetists (CRNAs) scope of practice expansion numerous times over the years, but the threat has never been more serious than it is now.

Buoyed by support from the Michigan Hospital Association (MHA), HB 4359 recently made its way through the state House and has since been passed on to the Senate for consideration. This process has made two truths abundantly clear:

1. Michigan's patients are more than numbers on a balance sheet. The bill sacrifices supervision of high-risk care in all settings to set the stage for staffing changes in hospitals that will strip patients' access to physicians. We're already seeing the endgame play out in states like Wisconsin, where one hospital recently announced its plan to replace all physician anesthesiologists with CRNAs.
2. The need for the physician community as whole to unite and advocate for what's in the best interest of our patients has never been greater.

MSMS has always worked to fill this role, uniting the voices of physicians throughout the state who are committed to delivering the best in quality care to patients across Michigan. However, in moments like this, the need for that unifying voice is greatest at our state capital. That's where MDPAC comes in.

When state lawmakers consider policy and legislation with the potential to dramatically alter the medical landscape—like HB 4359—MDPAC has been there to provide physicians with a seat at the table.

In years past, MDPAC—through effective lobbying and effort on the political front—has always worked with lawmakers to assure the safety of patients before, during, and after anesthesia.

We've reminded legislators that supervision of anesthesia care requires years of education and training and the experience and expertise that only physicians possess. MDPAC's success depends on your ongoing support.

## Easy Ways to Donate to the Medical Society Foundation:

The Medical Society Foundation is engaged in a Capitol Campaign. The purpose of the Campaign is to grow the corpus to support the charitable activities of the Genesee County Medical Society. Those activities include public and community health, support for the underserved, and wellness initiatives.

To continue its good work, the Medical Society Foundation is asking you to consider leaving a legacy gift to the Foundation. If all, or even a significant portion of our membership left just a small part of our estates to the Foundation, the Foundation could continue helping this community in so many ways, by supporting the Medical Society.

To make a gift, simply use these words:

In your Trust, "Grantor directs Trustee to distribute \_\_\_% of all assets then held in Trust or later added to this Trust to the Medical Society Foundation, to be held in an endowed fund and used in the discretion of its then existing board of directors in furtherance of the purposes of the Foundation."

In your Will, "I give, devise and bequeath \_\_\_% of my Estate to the Medical Society Foundation, to be held in an endowed fund and used in the discretion of its then existing Board of Directors in furtherance of the purposes of the Foundation."

While this is not a subject that is comfortable to broach, it is an opportunity to support the Foundation which supports the Medical Society's charitable activities on behalf of the membership. Please give. You can give via a trust or will. You can give from your IRA. You can give appreciated stock, and you can give cash. Please support the organization which does so much on behalf of the medical community and the patients we serve.

**Don't Forget!**  
Donations are tax deductible!

**Please contact GCMS at 733-9923 or email [executivedirector@gcms.org](mailto:executivedirector@gcms.org)**

The COVID-19 pandemic demonstrates how diseases without vaccines can devastate economic and public health. Vaccines have reduced and, in some cases, eliminated many diseases. In the U.S., there is currently no approved vaccine to prevent COVID-19. MDHHS is working with the CDC and Michigan stakeholders to prepare and plan for when the vaccine is available. The initial draft of our state's plan is now available and will be updated often in the coming months. Visit regularly for the most recent information on the COVID-19 vaccine and Michigan's preparations.

## Volunteer Sign Up – COVID-19 Vaccine Clinic

The Genesee County Health Department is looking for volunteers to assist in the delivery of COVID-19 vaccine throughout Genesee County. Please follow the steps below if you are at least 18 years old and interested in volunteering at an upcoming GCHD COVID-19 Vaccine Clinic.

**Submitting a volunteer application alone will not confirm you as a volunteer.**

Volunteer opportunities are available at our [Burton Branch](#) and at various TBD community locations.

**Step 1** – [CLICK HERE to complete volunteer application](#) (You must be at least 18 years old to volunteer)

**Step 2** – Your application will be processed (We are experiencing a high number of applications at this time. Applications may take 2-3 weeks to process.)

**Step 3** – Once your application has been processed, you will receive an email confirming your volunteer status. This email will provide instructions on how to select a volunteer date and time.

**Vaccines for volunteers may be available if there are appointment cancellations, but cancellations are rare and there is no guarantee of this availability. To be eligible for vaccine, volunteers must live or work in Genesee County.**

Have a question about volunteering? Visit our Volunteer FAQ [here](#)

## **Genesee County May Receive a Much Larger Supply of COVID Vaccinations to Distribute!**

### **Your Genesee County Practice Can Help :**

- If your Physician's Office/Practice is in the MICR system & approved to give COVID-19 vaccinations.
- If your Physician's Office/Practice would like to give the Covid-19 vaccination, but is not currently in the MICR system or is not approved for COVID vaccinations, please contact Genesee County Health Department to get registered.

If your Genesee County Practice is interested, please have them contact Joanne Herman @ [Joanne.herman76@gmail.com](mailto:Joanne.herman76@gmail.com)

Let's come together to help the most vulnerable patients get vaccinated!

## Medical Society Foundation

Consider a donation to the Medical Society Foundation for all of your holiday sentiments while supporting important health related causes.

The Medical Society Foundation has been coordinating physician giving in Genesee County since 1987. This holiday season, why not use the Foundation to make sure your gifts to family, friends and colleagues help to improve the health and well-being of our community.

By giving to the Medical Society Foundation, you receive a great year-end tax benefit at the same time you tell others how much their health- really means to you.

The Medical Society Foundation funds have been used to support the charitable activities of the Genesee County Medical Society.

Contributions can also be made in memory of an individual or to honor someone.

For questions or information on how your gift can help support the charitable activities of your Medical Society Foundation contact **GCMS at 733-9923** or email [executivedirector@gcms.org](mailto:executivedirector@gcms.org)

*Medical Society Foundation Mission Statement: The Medical Society Foundation is organized and does operate for the purpose of supporting continuing medical education and health-related charitable activities that further the cause of medicine.*

## **The Michigan Department of Health and Human Services launches the ‘We Treat Hep C Campaign and Hepatitis C Elimination Plan’**

The Michigan Department of Health and Human Services (MDHHS) is excited to [announce the release](#) of the state’s [Hepatitis C Elimination Plan](#) and launch of the [We Treat Hep C Initiative](#), effective April 1, 2021. This is significant as the Centers for Disease Control and Prevention has expanded their guidance to recommend [universal hepatitis C testing](#) for all adults 18 years and older, and among all pregnant women during every pregnancy.

The We Treat Hep C Initiative aims to make curative hepatitis C treatment more accessible by removing barriers to prescribing. Through this initiative, MDHHS has entered into an agreement with AbbVie, the manufacturer of the HCV direct-acting antiviral MAVYRET<sup>®</sup>, to make treatment available to all Medicaid and Healthy Michigan Plan beneficiaries. Starting April 1, Michigan Medicaid is removing prior authorization requirements for the preferred HCV medication, MAVYRET<sup>®</sup>.

The success of the We Treat Hep C Initiative will be directly tied to the state’s clinical community treating patients impacted by HCV. MDHHS is partnering with Wayne State University’s Midwest AIDS Training and Education Center to develop curricula and trainings for interested clinicians. Furthermore, MDHHS is contracting with Henry Ford Health System to maintain an HCV clinical consultation line to provide peer-to-peer advice to clinicians in the process of evaluating and treating their patients for HCV (313-575-0332, Monday – Friday 8 a.m. – 5 p.m., or online [HERE](#)).

For more information, updates, and resources, please visit [www.Mi.gov/WeTreatHepC](http://www.Mi.gov/WeTreatHepC) or contact the MDHHS Viral Hepatitis Unit at [MDHHS-Hepatitis@michigan.gov](mailto:MDHHS-Hepatitis@michigan.gov).
